

# TISSUE SAMPLER

## Product Description

The MF15 Tissue Tag takes a fast and clean collection of a tissue sample to test for genetics and disease.

Using the Tissue Tagger, a tissue sample is collected and hermetically sealed, with preservative in the sample container. The vial is pre-labelled with a scannable unique barcode, to tie to an animal's ID. That barcode can be matched with electronic or visual identification tags.

Samples can then be sent to a laboratory for testing, without the need for special packaging or refrigeration.

The pellets are not harmful, non-toxic and cannot cause cross-contamination in the laboratory.

## Technical Specifications

<b>Product Name</b>	MF15: Tissue Sampler
<b>Material</b>	TPU Polyurethane
<b>Applicator</b>	Z Tags Tissue Tagger
